This isn't a typical egg cookbook or guide to raising chickens, Epic Eggs takes a deep dive on the eggs themselves and tells you how to raise birds that will produce the best eggs you've ever seen. It may be true that most poultry found on small homesteads or in backyards especially are viewed as pets, but they are inarguably pets with benefits--namely eggs. In Epic Eggs, homesteader and writer Jennifer Sartell looks at the eggs of the most common types of poultry you’d find in your backyard: chickens, ducks, geese, turkeys, guineas, and quail. Don’t jump to conclusions! This isn’t an egg cookbook or a
guide to raising poultry. Jennifer delves into the eggs themselves and explains reproductive systems, egg anatomy, and how and why different colors are distributed to egg shells. Jennifer will show you a variety breeds of birds, and what sizes, shapes, and even colors of egg they produce; from white to blue, brown, chocolate, olive, and speckled, plus heritage breeds and how to breed for specific colors. Illustrated with fantastic color photography of eggs and their birds, Epic Eggs goes on to address how to optimize living conditions and diet for the healthiest and most-flavorful eggs, the process of grading and storing eggs, and the eternal washing debate. There’s also discussion of nutrition, baking, cooking, preserving, pickling, and dehydrating. The book ends with advice for homesteaders looking to create business plans and a section on troubleshooting.

**HULL User Guide for Three-dimensional Linking with EPIC3**

The computer code EPIC models fuel and coolant motion which results from internal fuel pin pressure (from fission gas or fuel vapor) and possibly from the generation of sodium vapor pressure in the coolant channel subsequent to pin failure in a liquid-metal fast breeder reactor. The EPIC model is restricted to conditions where fuel pin geometry is generally preserved and is not intended to treat the total disruption of the pin structure. The modeling includes the ejection of molten fuel from the pin into a coolant channel with any amount of voiding through a clad breach which may be of any length or which may extend with time. One-dimensional Eulerian hydrodynamics is used to treat the motion of fuel and fission gas inside a molten fuel cavity in the fuel pin as well as the mixture of two-phase sodium and fission gas in the coolant channel. Motion of fuel in the coolant channel is tracked with a type of particle-in-cell technique. EPIC is a Fortran-IV program requiring 400K bytes of storage on the IBM 370/195 computer. 21 refs., 2 figs.

"Epic Families not only identifies a problem within today's church but presents suggestions that equip parents to raise kids who are passionate for Jesus and offers ways that churches can partner with and empower parents in this mission. Definitely well worth the read!" - Rev. Allen Perdue Lead Pastor, Jersey Life Church Today's children are not raised in a bubble. Daily, they are bombarded with worldly wisdom and are tempted at earlier ages with things that would have stunned parents of previous generations. Epic Families strives to help parents reclaim their God-given mandate to raise their children to know and love Him. Developed through more than a decade of ministry experience as well as one-on-one coaching with parents and church staff, this book identifies ways that the church has taken over a role that was designed for parents. It offers suggestions to parents to help them confidently teach their children about the God who made them, loves them, and wants a relationship with them, while also suggesting ways that churches can partner with parents, while not usurping the parents' role. Epic Families can empower parents to inspire their children to trust God and make wise choices. In the busy and sometimes scary world we live in, parents need to intentionally showcase God's presence to their children and let Him permeate their lives; this book offers them a valuable resource to do that.
